Subject: text on why we're not doing QRA based on embalmers study

hi, Tom. here is my draft text for why we're not deriving quantitative risk estimates based on the embalmers study. i've done it as a track changes version of the original text about choice of epidemiology study for quantitative risk assessment, so the new text is in red. there's less than a page of new text, and i would appreciate it if you could review it. thanks! jj
